Introduction to Construction
“I CAN” Statements

“I CAN” demonstrate how to use tools and machines safely.

“I CAN” list 20 occupations related to the construction industry.

“I CAN” list 10 differences between past and present methods of construction.

“I CAN” identify a variety of systems, methods, and materials used for building construction technology.

“I CAN” identify design factors in Energy.

“I CAN” design factors in Geography.

“I CAN” identify design factors in Materials.

“I CAN” design factors in Material availability.

“I CAN” measure using standard construction tools.

“I CAN” demonstrate how to read and understand scale drawing.

“I CAN” demonstrate estimating principles.

“I CAN” identify common hand tools used in the construction industry.

“I CAN” identity common power tools used in the construction industry.

“I CAN” demonstrate safe practices regarding the use of these tools.

“I CAN” identify structural materials used in construction.

“I CAN” identify exterior covering materials used in construction.

“I CAN” identify interior covering materials used in construction.

“I CAN” identify fasteners used in construction.
